

B1954

12" DISC SANDER

User Manual

**WARNING !**

Do not operate this unit until reading and becoming familiar with the entire operation manual.

7

**WARNING !**

Do not use this Sander System near flammable or combustible liquids, gases, gasoline or other fuels, lighter fluid, cleaners, oil-based paints, natural gas, hydrogen, or explosive dusts like coal dust, magnesium dust, grain dust, or gun powder.

IMPORTANT SAFETY RULES

Woodworking can be dangerous if safe and proper operating procedures are not followed. As with all machinery, there are certain hazards involved with the operation of the product. Using the machine with respect and caution will considerably lessen the possibility of personal injury. However, if normal safety precautions are overlooked or ignored, personal injury to the operator may result.

Safety equipment such as guards, push sticks, hold-downs, featherboards, goggles, dust masks and hearing protection can reduce your potential for injury. But even the best guard won't make up for poor judgment, carelessness or inattention. Always use common sense and exercise caution in the workshop. If a procedure feels dangerous, don't try it. Figure out an alternative procedure that feels safer. **REMEMBER:** Your personal safety is your responsibility.

WARNING : FAILURE TO FOLLOW THESE RULES MAY RESULT IN SERIOUS PERSONAL INJURY

1. **FOR YOUR OWN SAFETY, READ INSTRUCTION MANUAL BEFORE OPERATING THE TOOL.** Learn the tool's application and limitations as well as the specific hazards peculiar to it.

2. **KEEP GUARDS IN PLACE** and in working order.

3. **ALWAYS WEAR EYE PROTECTION.**

4. **GROUND ALL TOOLS.** If tool is equipped with three-prong plug, it should be plugged into a three-hole electrical receptacle. If an adapter is used to accommodate a two-prong receptacle, the adapter lug must be attached to a known ground. Never remove the third prong.

5. **REMOVE ADJUSTING KEYS AND WRENCHES.** Form habit of checking to see that keys and adjusting wrenches are removed from tool before turning it "on".

6. **KEEP WORK AREA CLEAN.** Cluttered areas and benches invite accidents.

7. **DON'T USE IN DANGEROUS ENVIRONMENT.** Don't use power tools in damp or wet locations, or expose them to rain. Keep work area well-lighted.

8. **KEEP CHILDREN AND VISITORS AWAY.** All children and visitors should be kept a safe distance from work area.

9. **MAKE WORKSHOP CHILDPROOF** - with padlocks, master switches, or by removing starter keys.

10. **DON'T FORCE TOOL.** It will do the job better and be safer at the rate for which it was designed.

11. **USE RIGHT TOOL.** Don't force tool or attachment to do a job for which it was not designed.

12. **WEAR PROPER APPAREL.** No loose clothing, gloves, neckties, rings, bracelets, or other jewelry to get caught in moving parts. Nonslip footwear is recommended. Wear protective hair covering to contain long hair.

13. **ALWAYS USE SAFETY GLASSES.** Wear safety glasses. Everyday eyeglasses only have impact resistant lenses; they are not safety glasses. Also use face or dust mask if cutting operation is dusty.

14. **SECURE WORK.** Use clamps or a vise to hold work when practical. It's safer than using your hand and frees both hands to operate tool.

15. **DON'T OVERREACH.** Keep proper footing and balance at all times.

16. **MAINTAIN TOOLS IN TOP CONDITION.** Keep tools sharp and clean for best and safest performance. Follow instructions for lubricating and changing accessories.

17. **DISCONNECT TOOLS** before servicing and when changing accessories such as blades, bits, cutters, etc.

18. **USE RECOMMENDED ACCESSORIES.** The use of accessories and attachments not recommended by us may cause hazards or risk of injury to persons.

19. **REDUCE THE RISK OF UNINTENTIONAL STARTING.** Make sure switch is in "OFF" position before plugging in power cord.

20. **NEVER STAND ON TOOL.** Serious injury could occur if the tool is tipped or if the cutting tool is accidentally contacted.

21. **CHECK DAMAGED PARTS.** Before further use of the tool, a guard or other part that is damaged should be carefully checked to ensure that it will operate properly and perform its intended function - check for alignment of moving parts, binding of moving parts, breakage of parts, mounting, and any other conditions that may affect its operation. A guard or other part that is damaged should be properly repaired or replaced.

22. **DIRECTION OF FEED.** Feed work into a blade or cutter against the direction of rotation of the blade or cutter only.

23. **NEVER LEAVE TOOL RUNNING UNATTENDED. TURN POWER OFF.** Don't leave tool until it comes to a complete stop.

24. **DRUGS, ALCOHOL, MEDICATION.** Do not operate tool while under the influence of drugs, alcohol or any medication.

25. **MAKE SURE TOOL IS DISCONNECTED FROM POWER SUPPLY** while motor is being mounted, connected or reconnected.

26. **WARNING:** The dust generated by certain woods and wood products can be injurious to your health. Always operate machinery in well ventilated areas and provide for proper dust removal. Use wood dust collection systems whenever possible.

GENERAL SAFETY RULES FOR POWER TOOLS

WARNING: When using electric tools the following basic safety precautions should always be followed to reduce the risk of fire, electric shock and personal injury.

PLEASE READ ALL THESE INSTRUCTIONS BEFORE ATTEMPTING TO OPERATE THIS PRODUCT.

- 1. KEEP GUARDS IN PLACE,** and in working order.
- 2. REMOVE ADJUSTING KEYS AND WRENCHES.** Form habit of checking to see that keys and adjusting wrenches are removed from tool before turning it on.
- 3. KEEP WORK AREA CLEAN.** Cluttered areas and benches invite accidents.
- 4. DON'T USE IN DANGEROUS ENVIRONMENT.** Do not use power tools in damp or wet location, or expose them to rain. Do not operate them in an area with flammable liquids or gases. Keep work area well lighted.
- 5. KEEP CHILDREN AWAY.** All visitors should be kept at a safe distance from work area.
- 6. MAKE WORKSHOP CHILD PROOF.** Lock access of your workshop. When not in use, tools should be stored in a dry locked up place, out of reach of children.
- 7. DON'T FORCE TOOL.** It will do the job better and safer at the rate for which it was designed.
- 8. USE RIGHT TOOL.** Don't force tool or attachment to do a job for which it was not designed.
- 9. USE PROPER EXTENSION CORD.** Make sure your extension cord is in good condition. When using an extension cord, be sure to use one heavy enough to carry the current your product will draw. An undersize cord will cause a drop in line voltage resulting in loss of power and overheating.
- 10. WEAR PROPER APPAREL.** Do not wear loose clothing, gloves, neckties, rings, bracelet, or others jewellery which may get caught in moving parts. Nonslip footwear is recommended. Wear protective hair covering to contain long hair. Roll long sleeves above elbows.
- 11. ALWAYS USE SAFETY GOGGLES.** Everyday glasses only have impact resistant lenses, they are NOT safety glasses. Also use face or dust mask if cutting operation is dusty.
- 12. SECURE WORK.** Use clamps or a vice to hold work when practical. It is safer than using your hand and it frees both hands to operate tool.
- 13. DON'T OVERREACH.** Keep proper footing and balance at all times.
- 14. MAINTAIN TOOL WITH CARE.** Keep tool sharp and clean for best and safest performance. Follow instructions for lubrication and changing accessories.
- 15. DISCONNECT TOOLS** before servicing; when changing accessories, such as blades, bits, cutters and the like.
- 16. USE RECOMMENDED ACCESSORIES.** Consult the owner's manual for recommended accessories. The use of improper accessories may cause risk of injury to persons.
- 17. NEVER STAND ON TOOL.** Serious injury could occur if the tool is tipped or if cutting tool is unintentionally contacted.
- 18. CHECK DAMAGED PARTS.** Should any part of the tool be missing, damaged or any electrical component fails to perform properly, turn off the power and remove plug from power supply. Properly repair or replace damaged, missing and/or failed parts before resuming operation.
- 19. DIRECTION OF FEED.** Feed work into a blade or cutter against the direction of rotation of the blade or cutter only.
- 20. NEVER LEAVE TOOL RUNNING UNATTENDED. TURN POWER OFF.** Don't leave tool until it comes to a complete stop.
- 21. DO NOT ABUSE THE CORD.** Do not use cord to disconnect during operation. Never yank the cord to disconnect it from the socket.
- 22. ALWAYS KEEP ALERT.** Do not let familiarity gained from frequent use of your tool cause a careless mistake. Always remember that a careless fraction of a second is sufficient to inflict severe injury.
- 23. THINK SAFETY.** Safety is a combination of common sense and alertness whenever the tool is in operation.

IMPORTANT SAFETY RULES FOR

DISC SANDER

WARNING:

Basic precautions should always be followed when using your disc sander. To reduce the risk of injury, electrical should on fire, comply with the safety rules listed below:

1. **WARNING:** Do not operate your machine until it is completely assembled and installed according to the instructions.
2. **CAUTION:** The machine is designed to sand wood or wood-like products only. Sanding or grinding other materials could result in fire, injury or damage to product.
3. **THIS MACHINE** is intended for indoor use only.
4. **IF YOU ARE NOT** thoroughly familiar with the operation of Abrasive Finishing Machines, obtain advice from your supervisor, instructor or other qualified person.
5. **IF THERE IS ANY TENDENCY** for the machine to tip over or move during certain operations when sanding long or heavy boards, the machine must be securely fastened to a supporting surface.
6. **ALWAYS** hold the work firmly on the table when sanding on the disc.
7. **ALWAYS** sand on downward side of disc when using the disc portion of the machine, so that the work is held securely on the table. Sanding on the upward side of the disc could cause the workpiece to fly up which could be hazardous.
8. **NEVER** wear gloves or hold the work with a rag when sanding.
9. **SAND** with the grain of the wood.
10. **DO NOT** sand pieces of material that are too small to be safely supported.
11. **AVOID** awkward hand positions where a sudden stop could cause a hand to move into the disc.
12. **WHEN** sanding a large workpiece, provide additional support at table height.
13. **DO NOT** sand with the workpiece unsupported. Support the workpiece on the worktable.
14. **ALWAYS** remove scrap pieces and other objects from the table, backstop before turning the machine "ON"
15. **NEVER** perform layout, assembly or set-up work on the table while the sander is operating.
16. Always turn the machine "OFF" and disconnect the cord from the power source before installing or removing accessories.
17. **NEVER** leave the machine work area when the power is "ON" or before the machine has come to a complete stop.
18. Make sure sanding disc runs in the proper direction.
19. Make sure the sanding disc is not turn or loose.

GROUNDING (North America and Australia Only)

1. In the event of a malfunction or breakdown, grounding provides a path of least resistance for the electric current, to reduce the risk of electric shock. This machine is equipped with an electrical cord that has an equipment grounding conductor and a grounding plug. The plug must be plugged into a matching outlet that is properly installed and grounded in accordance with all local codes and ordinances.
2. Do not modify the plug provided. If it will not fit the outlet, have the proper outlet installed by a qualified electrician.
3. Improper connection of the equipment grounding conductor can result in the risk of electric shock. The conductor with the green outer insulation (with or without a yellow stripe), is the equipment grounding conductor. If repair or replacement of the electrical cord is necessary, do not connect the equipment grounding conductor to a live terminal.
4. Check with a qualified electrician or serviceman if the grounding instructions are not completely understood, or if there is doubt as to whether the machine is properly grounded.
5. Using only three-wire extension cords that have three-prong grounding plugs and three pole receptacles that accept the tool's plug.
6. Repair or replace damaged or worn cord immediately.
7. Your unit is for use on less than 150 volts and it has a plug that looks Fig. "A"
8. This machine is intended for use on a circuit that has an outlet that looks like the one in illustration (A). The machine has a grounding plug that looks like the plug in illustration (A). A temporary adapter, which looks like the adapter in illustration (B) and (C), may be used to connect the plug to a two pole receptacle, as shown in illustration (B), if a properly grounded outlet is not available. The temporary adaptor should only be used until a properly grounded outlet can be installed by a qualified electrician. The green coloured rigid ear plug and the like extending from the adapter, must be connected to a permanent ground such as a properly grounded outlet box.

NOTE: The type of electrical plug and receptacle differs from country to country.

CAUTION: In Canada, only the grounding shown in figure (A) is acceptable. The extension cord should be a CSA certified S.J.T. type or something better.

CAUTION: In Australia, only the grounding shown in figure (D) is acceptable. The extension cord should be SSA certified.

EXTENSION CORDS

Extension Cords

WARNING : The use of damaged cords can shock, burn or electrocute.

Replace damaged or worn cords immediately. The table shows the correct size to use, depending on cord length and nameplate amperage rating of tool. If in doubt, use the next heavier gauge. An undersized cord will cause a drop in line voltage, resulting in loss of power and over-heating.

NOTE : The smaller the gauge number, the heavier the cord. Use only three-wire extension cords with three-hole receptacles, which accept the tool plug and have three-prong grounding-type plugs. Three-wire extension cords are available.

(North American Only)
**Recommended Minimum Gauge for Cord Extensions
for Portable Electric Tools**

Wire Gauge Chart A. W. G.					
Name Plate Amps.	120V	Cord Length in Feet			
		25	50	100	150
3-6		18	16	16	14
6-8		18	16	14	12
8-10		18	16	14	12
10-12		16	16	14	12
12-16		14	12	Not Recommended	

WARNING :

1. Make sure the sanding belt or disc is not torn or loose.
2. Avoid kickback by sanding in accordance with directional arrows, sand on the downward side of the disc. Sanding on the upward side could cause the workpiece to fly up causing injury.
3. Always maintain a maximum clearance of 1.6mm between the table and the sanding disc.
4. Always wear eye protection when operating the sander.
5. The work table is the surface on which the workpiece rests when performing a sanding operation.
6. Transporting / Carrying the machinery by holding the handle bar by one person.
7. Fixing the disc sander on the workbench by using 4 pcs 5/16" x 3/4" (M8x20) HEX. HD. screw.

MACHINERY DATA

WITH UL & CSA APPROVED

MOTOR.....	9.5A/120v/60Hz
DISC.....	12"
TABLE.....	400x225mm(Aluminum)
DISC SPEED.....	1720 RPM
DUST HOOD.....	2-1/2"(63mm)
NET WEIGHT.....	31.5 KGS
GROSS WRIGHT.....	33.5 KGS

HOW TO REPLACE THE 12" SANDING PAPER

WARNING:

Make sure tool is disconnected from power supply while motor is being mounted, connected or reconnected.

Step 1:

To change the sanding paper, please loosen the four-screw (A) (B), which are on disc cover left and right side and motor.

(A) screws are on the left and right side of disc cover.

(B) screws are the left and right side of motor.

Step 2:

Take off the disc cover with table. Then loosen the two-screw (C), which are on the dust hood cover left and right side.

Step 3:

Open the dust hood cover, then you can replace the 12" sanding paper easily.

HOW TO CHANGE THE 12" ALUMINUM DISC

Step 1:

Open dust hood cover, fix the motor shaft by wrench (P/NO.37) and then turn the disc in the reversing direction to take the disc off from the motor shaft.

When operating the machinery, please ensure the direction of rotation. (Reversing)

Before turning on the switch, please make sure to put on the flexible hose into the dust hood, 2-1/2"(63mm), and with hose clamp.

Operation

LOCKING SWITCH IN THE "OFF" POSITION

We suggest that when sander is not in use, the switch be locked in the "OFF" position. This can be done by grasping the switch key and pulling it out of the switch with the switch key removed, the switch will not operate. However, should the switch key be removed while the sander is running, it can be turned "OFF" once, but cannot be restarted without inserting the switch key. Place the toggle in a location that is inaccessible to children and other not qualified to use the tool.

Operation example 1 BEVEL SANDING

Operation example 2 SURFACE SANDING

NOISE DATA

A- weighted equivalent sound pressure level at the operator's ear is

$L_{a.eq}=95.7 \text{ dB(A)}$

The sound power level emitted by the tool is $L_{w.eq}=97.9 \text{ dB(A)}$

ORDERING REPLACEMENT PARTS

Replacement parts may be ordered from your local distributor. When ordering replacement parts, always provide the following information :

1. The model number and serial number of the 12" disc sander.
2. The parts number.
3. The parts name.
4. The desired quantity of the part.

TROUBLE SHOOTING

TROUBLE	PROBABLE CAUSE	CORRECTION
Motor does not run when power switch is pressed "ON"	1. Switch is burnt out. 2. Connection wire is loose or damaged.	1. Replace the switch. 2. Tighten wire or replace wire.
Motor does not run at full speed.	1. Power voltage is too low. 2. Motor is damaged.	1. Test voltage. 2. Check and repair motor
Motor does not reach full power.	1. Incorrect power wiring. 2. Overloaded.	1. Replace with the correct size of the power wiring. 2. Reduce load.
Motor overheating	1. Motor voltage is different 2. Motor is damaged	1. Check the voltage label 2. Check and repair motor

WARRANTY

CRAFTEX 2 YEAR LIMITED WARRANTY

Craftex warrants every product to be free from defects in materials and agrees to correct such defects where applicable. This warranty covers **two years** for parts and 90 days for labour (unless specified otherwise), to the original purchaser from the date of purchase but does not apply to malfunctions arising directly or indirectly from misuse, abuse, improper installation or assembly, negligence, accidents, repairs or alterations or lack of maintenance.

Proof of purchase is necessary.

All warranty claims are subject to inspection of such products or part thereof and Craftex reserves the right to inspect any returned item before a refund or replacement may be issued.

This warranty shall not apply to consumable products such as blades, bits, belts, cutters, chisels, punches etceteras.

Craftex shall in no event be liable for injuries, accidental or otherwise, death to persons or damage to property or for incidental contingent, special or consequential damages arising from the use of our products.

RETURNS, REPAIRS AND REPLACEMENTS

To return, repair, or replace a Craftex product, you must visit the appropriate Busy Bee Tools showroom or call 1-800-461-BUSY. Craftex is a brand of equipment that is exclusive to Busy Bee Tools.

For replacement parts directly from Busy Bee Tools, for this machine, please call 1-800-461-BUSY (2879), and have your credit card and part number handy.

- All returned merchandise will be subject to a minimum charge of 15% for re-stocking and handling with the following qualifications.
- Returns must be pre-authorized by us in writing.
- We do not accept *collect* shipments.
- Items returned for warranty purposes must be insured and shipped pre-paid to the nearest warehouse
- Returns must be accompanied with a copy of your original invoice as proof of purchase. Returns must be in an un-used condition and shipped in their original packaging a letter explaining your reason for the return. Incurred shipping and handling charges are not refundable.
- Busy Bee will repair or replace the item at our discretion and subject to our inspection.
- Repaired or replaced items will be returned to you pre-paid by our choice of carriers.
- Busy Bee reserves the right to refuse reimbursement or repairs or replacement if a third party without our prior authorization has carried out repairs to the item.
- Repairs made by Busy Bee are warranted for 30 days on parts and labour.
- Any unforeseen repair charges will be reported to you for acceptance prior to making the repairs.
- The Busy Bee Parts & Service Departments are fully equipped to do repairs on all products purchased from us with the exception of some products that require the return to their authorized repair depots. A Busy Bee representative will provide you with the necessary information to have this done.
- For faster service it is advisable to contact the nearest Busy Bee location for parts availability prior to bringing your product in for repair.
