GENERAL SAFETY INSTRUCTIONS FOR MACHINES

Extreme caution should be used when operating all power tools. Know your power tool, be familiar with its operation, read through the user manual and practice safe usage procedures at all times.

- ALWAYS read and understand the user manual before operating the machine.
- CONNECT your machine ONLY to the matched and specific power source.
- ALWAYS wear safety glasses respirators, hearing protection and safety shoes, when operating your machine.
- DO NOT wear loose clothing or jewelry when operating your machine. Wear protective hair covering.
- A SAFE ENVIRONMENT is important. Keep the area free of dust, dirt and other debris in the immediate vicinity of your machine.
- BE ALERT! DO NOT use prescription or other drugs that may affect your ability or judgment to safely use your machine.
- DISCONNECT the power source when changing drill bits, hollow chisels, router bits, shaper heads, blades, knives or making other adjustments or repairs.

- NEVER leave a tool unattended while it is in operation.
- NEVER allow unsupervised or untrained personnel to operate the machine
- NEVER reach over the table when the tool is in operation.
- ALWAYS keep blades, knives and bits sharpened and properly aligned.
- ALL OPERATIONS MUST BE performed with the guards in place to ensure safety.
- ALWAYS use push sticks and feather boards to safely feed your work through the machine.
- ALWAYS make sure that any tools used for adjustments are removed before operating the machine.
- ALWAYS keep bystanders safely away while the machine is in operation.
- NEVER attempt to remove jammed cutoff pieces until the blade has come to a full stop.

CX407N – SUPER 3 SPEED AIR CLEANER SPECIFIC SAFETY INSTRUCTIONS

- ALWAYS read and understand the user manual before operating the air cleaner.
- CX407N IS ONLY designed to remove very fine wood particles from the air. Do not use it as a dust collector.
- ALWAYS secure any aprons, clothing, and long hair away from the intake side of the air cleaner unit and any moving parts.
- ALWAYS research the dangers of the specific species of wood you are working with, as dust from some woods is toxic and can make you sick and lead to long-term respiratory problems.
- KEEP your fingers and tools away from the fan output screen during fan operation.
- ALWAYS keep the filters serviced and never attempt to replace filters while the air cleaner is operating.
- ONLY operate this air cleaner in a dry environment.

- DO NOT operate this air cleaner in an environment that has volatile fumes from fuels, paints, pesticides, smoke, etc.
- NEVER operate the air cleaner in an environment that has particles of silica, metal, asbestos, or hazardous bacteria.
- MAKE SURE before making any adjustments, servicing, or installing parts, the switch is in the "OFF" position and the cord is un-plugged from the power source.
- DO NOT place your hands or tools near the open inlet during operation for any reason.
- ALWAYS make sure that the air cleaner is in a stable position, either it is hung from the ceiling or placed on the table.
- MAKE SURE you have read and understood all the safety instructions in the manual, and you are familiar with your air cleaner, before operating it. If you fail to do so, serious injury could occur.

WARNING!

The safety instructions given above can not be complete because the environment in every shop is different. Always consider safety first as it applies to your individual working conditions.

CX407N - AIR CLEANER FEATURES

MODEL CX407N - SUPER 3 SPEED AIR CLEANER

As part of the growing line of Craftex woodworking equipment, we are proud to offer the CX407N, a Super 3 Speed Air Cleaner. By following the instructions and procedures laid out in this user manual, you will receive years of excellent service and satisfaction. The CX407N is a professional tool and like all power tools, proper care and safety procedures should be adhered to.

	Motor	1/3-HP, 120-Volts, Single Phase, 60-Hz
\$	Motor Low Speed	770 RPM
\$	Motor Medium speed	980 RPM
\$	Motor High Speed	1100 RPM
\$	Fan Low Speed Sound Rating	62 dB
\$	Fan Medium Speed Sound Rating	65 dB
\$	Fan High Speed Sound Rating	69 dB
\$	Air Flow at Low Speed	720 CFM
\$	Air Flow at Medium Speed	1115 CFM
\$	Air Flow at High Speed	1290 CFM
\$	Primary Filter	5-Micron
\$	Secondary Filter	1-Micron
\$	Unit Dimensions	Length 30-1/4" x Width 24-1/8" x Height 12-1/8"
\$	Weight	56 lbs
\$	Warranty	3 Years

UNPACKING

The machine is properly packaged and shipped completely in a box for safe transportation. When unpacking, carefully inspect the box and ensure that nothing has been damaged during transit. Open the box and check that the machine and the parts are in good condition.

WARNING!

CX407N is a heavy machine, do not over-exert yourself.

В.	Primary Filter (5-Micron)	1		
C.	Secondary Filter (1-Micron)	1		

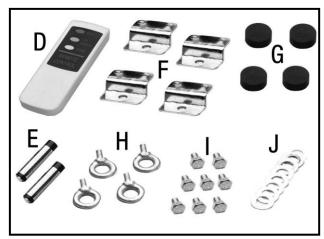

Figure-2 Inventory

LIST OF CONTENTS QTY D. Remote Control 1 E. AAA Battery 2 F. Flange Bracket 4 G. Rubber Feet 4 H. Eye Bolts (M10 - 1.5) 4 I. Hex Bolts (M6-1.0 x 8) 8 J. Flat Washers (6 mm) 8

NOTE: While doing inventory, if you cannot find any part, check if the part is already installed on the machine.

Some of the parts come preassembled with the machine because of shipping purposes.

Attention

Please remove all packing material from inside the air cleaner. Failure to do so will result in permanent damage to the machine.

PROPER GROUNDING

Grounding provides a path of least resistance for electric current to reduce the risk of electric shock.

Make sure the cord is plugged into a properly installed and grounded power outlet. To prevent electrical hazards, have a qualified electrician to ensure that the line is properly wired.

Make sure that the air cleaner is connected to an outlet having the same configuration as the plug. If an adaptor plug is used, it must be attached to the metal screw of the receptacle.

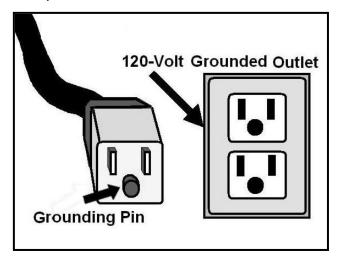

Figure-3 120-Volts Outlet for CX407N

It is strongly recommended not to use extension cords with your CX407N. Always try to position your machine close to the power source so that you do not need to use extension cords.

If you really find it necessary to use an extension cord, make sure the extension cord does not exceed 50-feet in length and the cord is 14-gauge to prevent motor damage.

WARNING!

Improper connection of the equipmentgrounding conductor can result in a risk of electric shock. Check with a qualified electrician if you are in doubt as to whether the outlet is properly grounded.

MOUNTING

The CX407N can be mounted in three ways:

TABLETOP MOUNT: Using rubber feet and/or the flush mount flange brackets for a table-top application.

HANGING MOUNT: Using eye bolts for a high ceiling application.

FLUSH MOUNT: Using flange brackets for a wall or low ceiling application.

WARNING!

Make sure the air cleaner is OFF and the cord is disconnected from the power source while installing, removing, servicing, and performing any maintenance job.

TABLETOP MOUNT

The CX407N can be used as a portable air filtration system by installing the rubber feet and placing the unit on a workbench or a table.

To set up the air cleaner for tabletop operation:

Get the help of an assistant and carefully place the air cleaner unit upside down.

The rubber feet feature sticky backing. Attach the rubber feet to the bottom of the air cleaner as shown in figure 4.

For permanent tabletop mounting, refer to the Flush Mount procedure on page-9 and install the unit on the tabletop with the flush mount flange brackets.

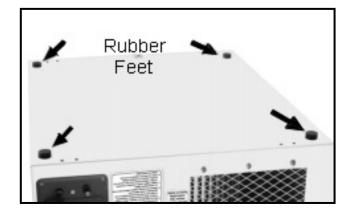

Figure-4 Rubber feet attached to the bottom of the air cleaner unit

HANGING MOUNT

The CX407N can be hung from the ceiling, operating at an optimum height from the floor.

To install the CX407N, hung from the ceiling:

Install four chains, cable, or steel strapping lines to the ceiling from the support or joist capable of holding 105 lbs.

Remove the plug screws and retain these screws as you will need to reinstall them to seal back the air filter unit when eye bolts are removed.

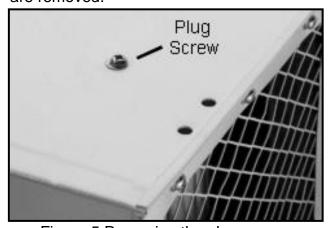

Figure-5 Removing the plug screws

Thread the eye bolts into the hole where plug screws were removed. See figure 6.

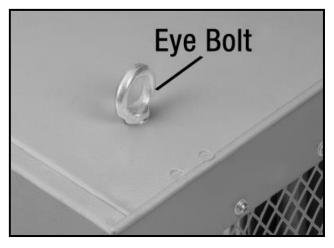

Figure-6 Installing the eye bolt

Tighten the eye bolts until they are snug against the air filter.

Get the help of an assistant or a friend and raise the air cleaner and secure the four hanging lines through the four eye bolts.

WARNING!

Do not fasten the air cleaner onto sheet rock or dry wall, drop ceiling tile or frame. Do not use a rope or power cord to hang the air cleaner. Do not locate the unit in a corner or near any heating or cooling vents. Do not use chain rated for a less minimum of 150 lbs working load for each support. Do not use fasteners that can tear out and make the air cleaner fall.

Failure to follow these instructions may result in serious damage (to the unit), injury or death.

When the air cleaner is supported by wood structural member:

- The minimum recommended eye bold size should be 5/16" -18" x 2" (not supplied)
- ♦ 1/4" pilot holes are recommended to help guide the eye bolts.
- Ensure the eye bolts penetrate at least 40mm into the wood structure.

When the air cleaner is supported by concrete structure:

- The minimum recommended expansion eye bolt size is 5/16" 18" x 2".
- Drill 12mm pilot holes into the concrete structure and press the expansion eye bolt into hole and tighten the bolt until it is securely held to the ceiling.

FLUSH MOUNT

When the shop is small, the CX407N air cleaner can be installed flush to the ceiling of the shop or to the tabletop using flange mounts.

Mount the air cleaner ONLY to load bearing supports, wall studs, steel chain or table that can hold 150 lbs of load.

To install the air cleaner:

Locate the supports in the wall or ceiling and mark the air cleaner unit bolt pattern on the wall or ceiling (17-1/4" from left to right and 31" from front to rear)

Drill the holes to accept at least 1/4" shank bolts for studs or use 1/4" nuts, bolts and washers for mounting.

Place the flange bracket under the air cleaner lip at the mounting hole location and secure it using screws and washers provided as shown in figure 7.

Install the other three flange brackets in the same manner.

For permanent tabletop mounting, use the lower lip holes.

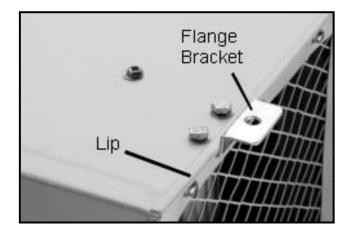

Figure-7 Mounting flange bracket to the air cleaner

Get the help of an assistant or a friend to lift the air cleaner and secure it to the wall or the ceiling using screws and washers (not provided).

WARNING!

Do not use support rated for a less minimum of 150 lbs working load. Do not use fasteners that can tear out and make the air cleaner fall down.

Failure to follow these instructions may result in serious damage (to the unit), injury or death.

CONTROL PANEL

The CX407N control panel allows you turn the air cleaner ON and OFF manually and set the fan speed.

Figure-8 Control panel

The control panel features two buttons: OFF and ON/SPEED.

OFF Button: Allows turning the air cleaner OFF manually.

ON/SPEED Button: Allows turning the air cleaner ON with one push of the button and for every additional push, the fan cycles from Low to Medium to High. The speed selection is indicated by a red LED light.

REMOTE CONTROLLER

The CX407N is provided with a remote controller which enables the operator to operate the air cleaner remotely.

The remote control works within 75 feet range from the air cleaner unit and uses two AAA batteries. See figure-9.

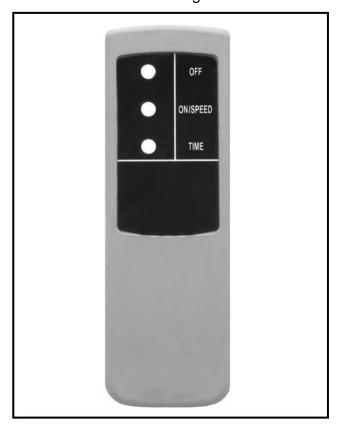

Figure-9 Remote controller for CX407N

The remote controlller features:

OFF Button: Turns power to the air cleaner OFF.

ON/SPEED Button: Allows turning the air cleaner ON with one push of the button and for every additional push, the fan cycles from Low to Medium to High.

TIME Button: Allows setting the auto shutoff time for the air cleaner in 1 hour, 2 hours, and 4 hours.

FILTERS

When to change the primary filter and when to service the secondary filter depends upon the usage of the air cleaner.

Checking the filters once a week for small shops is good while checking once a day is very important for heavy use and big shops.

WARNING!

Make sure to wear a dust mask and safety glasses when servicing and changing filters. The tiny dust particles can go into your lungs and cause serious long-term illness.

WARNING!

Make sure the unit is OFF and the cord is disconnected from the power source when installing, removing, or servicing any part of the unit.

CHANGING / SERVICING THE FILTERS

Disconnect the unit from the power source.

Move the retainer latch upward and remove the primary filter as shown in figure-10.

Remove the secondary filter and wash it with warm water until it is clean. Let it dry. See figure 11.

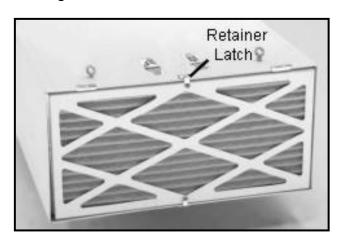

Figure-10 Removing the primary filter

Remember not to clean the secondary filter using compressed air. Doing so, will damage the filter and reduce the filtering qaulity.

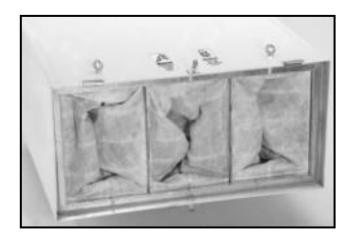

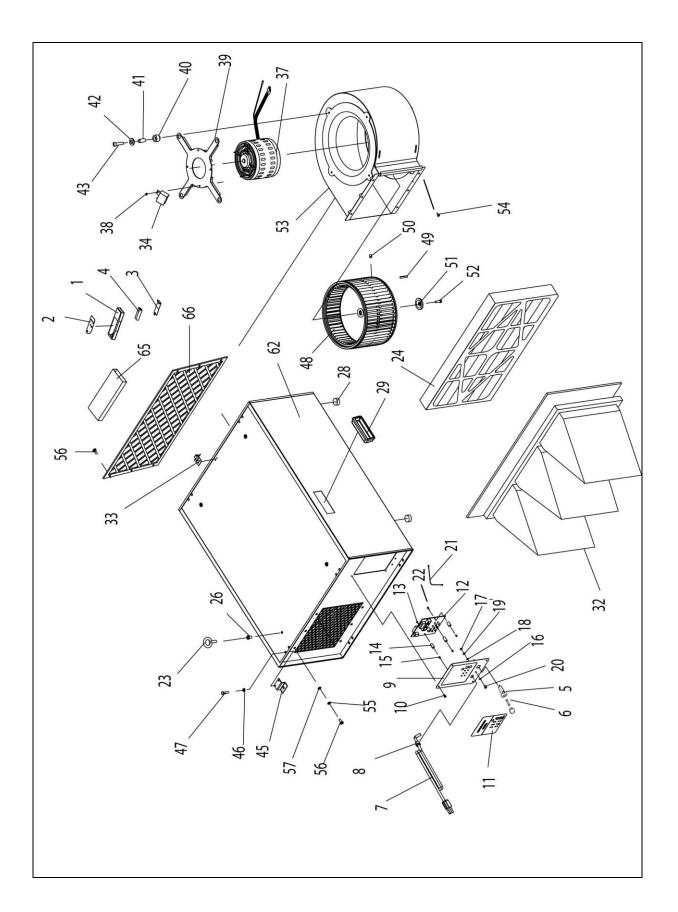

Figure-11 Secondary filter

Vaccum the dust inside the air cleaner and reinstall the secondary filter.

Install a new primary filter and push the retainer latch down to hold the filter.

Craftex Machinery Warranty

Busy Bee Tools warrants every Craftex machine to be free from defects in materials and agrees to correct such defects where applicable. This warranty covers **two years** for Craftex machines and **three years** for Craftex CX-Series Machines and 90 days for labor (unless specified otherwise), to the original purchaser from the date of purchase but does not apply to malfunctions arising directly or indirectly from misuse, abuse, improper installation or assembly, negligence, accidents, repairs or alterations or lack of maintenance. *Proof of purchase is necessary*.

All warranty claims are subject to inspection of such products or part thereof and Busy Bee Tools reserves the right to inspect and all items before a refund or replacement may be issued. A Machinery Return Form must be filled out by the original purchaser requesting a return. Authorization may take up to 72 hours for inspection and approval.

This warranty shall not apply to consumable products such as blades, bits, belts, cutters, chisels, punches etc...

Busy Bee Tools shall in no event be liable for injuries, accidental or otherwise, death to persons or damage to property or for incidental contingent, special or consequential damages arising from the use of our products.

RETURNS, REPAIRS AND REPLACEMENTS

To return, repair, or replace a Craftex Machine, a Machinery Return Form must be filled out by the original purchaser requesting a return. Visit the appropriate Busy Bee Tools showroom or call 1-800-461-BUSY. Craftex is a brand of equipment that is exclusive to Busy Bee Tools.

For replacement parts directly from Busy Bee Tools, for this machine, please call 1-800-461-BUSY (2879), and have your credit card and part number handy. You can find the part number in the back of your owner's manual under the parts list & exploded diagram.

- All returned merchandise will be subject to a minimum charge of 15% for re-stocking and handling.
- A Machinery Return Form must be filled out by the original purchaser requesting a return and it must be approved by Busy Bee Tools in writing before accepting a return.
- We do not accept *collect* shipments.
- Items returned for warranty purposes must be insured and shipped pre-paid to the nearest warehouse.
- Returns must be accompanied with a copy of your original invoice as proof of purchase. Incurred shipping and handling charges are not refundable.
- Busy Bee Tools will repair or replace the item at our discretion and subject to our inspection.
- Repaired or replaced items will be returned to you pre-paid by our choice of carriers.
- Busy Bee Tools reserves the right to refuse reimbursement or repairs or replacement if a third party without our prior authorization has carried out repairs to the item.
- Repairs made by Busy Bee Tools are warranted for 30 days on parts and labour.
- Any unforeseen repair charges will be reported to you for acceptance prior to making the repairs.
- Replacement motors purchased from Busy Bee Tools carry a 90 manufactures defect warranty.
- The Busy Bee Tools Parts & Service Departments are fully equipped to do repairs on all products purchased from us with the exception of some products that require the return to their authorized repair depots. A Busy Bee Tools representative will provide you with the necessary information to have this done.
